

## Pediatric intestinal obstruction

Amin Gohary

Burjeel Hopital, UAE.

### Abstract

#### Learning Objectives:

- 1: Recognize the difference between vomiting due to medical and that related to surgical pathology
- 2: Discuss the different causes of surgical vomiting
- 3: Review the impact of bilious vomiting and its significance

Vomiting in children is common and mostly related to medical condition. However there are surgical conditions associated with vomiting which needs to be acknowledge and diagnosed early. Bilious vomiting is an ominous symptom and needs to be taken seriously. Any baby who vomits bile should be considered as having an underlying intestinal obstruction until proved otherwise.
